

IntelliGuard™ Optical Channel Performance Monitors

BaySpec's OCPM Series monitors are embedded, integrated spectrum analyzers delivering precise measurement and powerful processing capabilities for dense wavelength division multiplexing (DWDM) applications.

Feature/Benefits:

- Real-time <1 ms response time for raw data
- High dynamic range - 50 dB
- High reliability - no moving parts and GR-63/1209/1221 qualified
- Athermal design for ultra-low power consumption
- Compact for new system space constrained environments 68 x 96 x 15.8 mm³; legacy designs available upon request
- Supports different modulation schemes for 10/40/100 GHz transmission
